## **SKILLS**

- **Use of languages Java, C, HTML, Javascript, PHP, SQL**
- **Good verbal communicator**
- **Good problem solver**
- **Good at analysing data**

## **WORK EXPERIENCE**

**InCommunities** *8th March 2010 – 19th March 2010*

During my two week period at InCommunities I developed a number of new skills. In particular, I grew more confident around people and my verbal communications improved as I was brought out of my comfort zone. My confidence also increased with using computers as throughout my two week the team saw my technical ability and trusted me more and more to work with the computers. By week two I was asked to work with sensitive client data and make alterations to clients information on the system. I was also asked to help clients with the computers in the reception lobby. During my time I also got to experience a number of house viewings and inspections which helped me see another aspect of company and client relations outside of the workplace zone.

## **HOBBIES AND INTERESTS**

One of my hobbies is playing football which I do socially on a weekly bases with friends. I enjoy spectating football games as I go to support league one side Oldham Athletic when possible. Between the ages of 5 and 16 I played football competitively for my local team Queensbury celtic. Playing for the team taught me a number of leadership and communication skills that I use now on a regular bases. I also enjoy watching PDC darts on sky sports and I have keen interest in the deep house/electronic music scene. During my free time I also regularly play computer games. I have great interests in all sorts of technologies as I often listen to podcasts on iTunes and have feedly set up to my google chrome homepage to keep up-to-date with changing technology, science and other news.
